Oficina: Martes 15:00-16:30 y Jueves 16:00-17:30 o previa cita

¿Por qué muchas decisiones colectivas son (in)eficientes y/o favorecen a algunos a expensas de otros? ¿A qué se debe que algunos individuos tengan mucha más influencia que otros en la toma de decisiones comunes? ¿En qué medida la disponibilidad de información sobre las intenciones, acciones o expectativas de los demás genera resultados colectivos Pareto-subóptimos? Así como hay países (y empresas, y partidos políticos, y clubes de fútbol) que “funcionan bien,” otros parecen estancados en un equilibrio perverso del que (casi) todos se beneficiarían de salir. En este curso explicaremos dicha variación no como consecuencia de la bondad o maldad de los seres humanos, ni como producto del accionar maligno de fuerzas oscuras, sino como resultado de la interacción entre múltiples actores que pueden tener buenas razones para desconfiar de las intenciones, capacidades o expectativas de sus pares.

El curso consta de cuatro partes. Comenzaremos viendo en qué medida el comportamiento de los individuos de carne y hueso se ajusta al ideal del *Homo œconomicus*. Luego estudiaremos cómo las asimetrías de información y los problemas de agencia moldean la representación política y el funcionamiento de las instituciones jerárquicas, como las burocracias y las “máquinas” clientelares. En tercer lugar pasaremos revista al rol de la coordinación de expectativas en fenómenos como la obediencia a la autoridad, las protestas ciudadanas, el respeto de las normas legales, o las campañas electorales. Por último examinaremos por qué la dificultad de comprometerse a actuar en contra de los propios intereses suele resultar en instituciones y políticas estables pero subóptimas.
